SANIJET®
PIPELESS HYDROTHERAPY

For: SANIJET

FOR IMMEDIATE RELEASE

PEDI-SENSE:
WHAT YOU NEED TO KNOW BEFORE YOU PUT A TOE IN A PEDICURE BATH

- SANIJET® has solution to the spreading pedi-epidemic:
the revolutionary Pipeless™ Pedicure -

What you don't know about pedicures could put you in serious danger. Research conducted by a leading microbiologist reveals that water samples drawn from traditional piped whirlpool and pedicure systems contained large quantities of potentially harmful bacteria, including Legionella, Staphylococcus, E. coli, and Pseudomonas. These bacteria can lead to scarring, disfigurement and even death.

The cause of the spreading pedi-epidemic lurks in the presumably "clean" water that is used for each new treatment in traditional piped pedicure baths. With each use, water and dirty bath residue (soap scum, dirt, scale deposits, hair, body oils, etc.) are retained within a hidden maze of unreachable pipes and plumbing. This creates a fertile breeding ground for bacteria and turns fresh water into a potential source of infection. As the industry's first technological advancement in more than three decades, SANIJET's revolutionary pipeless technology effectively addresses the "clean" water problem.

Free from invisible bacteria that plague traditional pedicure and whirlpool baths, SANIJET's unique pipeless design delivers an authentic spa-quality experience, the way bathing was meant to be. SANIJET prevents bacteria and other microorganisms from building up within the system by eliminating the hidden inaccessible surfaces where they collect. Only SANIJET pipeless technology has an independently certified cleaning procedure that allows complete disinfection.

SANIJET makes safety its highest priority, and was awarded certification from NSF International (formerly National Sanitation Foundation) after rigorous testing. In addition to unparalleled safety standards and system performance, maintenance is effortless, and cleaning is easy and proven effective. All components can be easily removed, inspected, and cleaned in about five minutes, ensuring that each bath is 99.9% clean and safe.

-more-

SANIJET also offers luxurious features not found in traditional piped pedicure and whirlpool baths. Use of spa products (such as essential oils, thermal spring salts, and other bath additives) is discouraged in piped pedicure and whirlpool baths as buildup accumulates in pipes, pumps and fittings creating an unsanitary environment. SANIJET Pipeless Baths effectively resolve this issue and give users freedom to use spa products.

Enhancing the spa-quality experience further, SANIJET's ultra-quiet operation allows bathers to relax and unwind in true peace and quiet, unlike noisy piped whirlpools or air bubble systems. And because of the pipeless design, water in the SANIJET bath never leaves the tub, retaining heat and maintaining the desired water temperature for a comfortable pedicure experience. SANIJET's luxurious design also features adjustable pre-programmed hydrotherapy massage settings and chromatherapy.

SANIJET is preferred by leading destination resorts, spas and salons, such as Canyon Ranch SpaClub at the Venetian, The Spa at The Hotel Hershey, The Ritz-Carlton Spa Grande Lakes, and The Spa Coeur d'Alene. SANIJET's Pipeless™ Pedicure Collection includes the Mirai Pipeless™ Pedicure Chair, Pipeless™ Reflexology Pedicure Baths, and the Pipeless™ Portable Foot Bath.
